

ZERO AIR POLLUTION EMITTED SINCE 1999!

Go 'Carbon Neutral' and Get The Best Deck Performance On The Market With The All New...

All New Urethane “Backbone” Technology combined with our Traditional Oil/Alkyd formula shows durability improvement on this outdoor foot bridge after one year of use.

(**Double** durability on decks!)

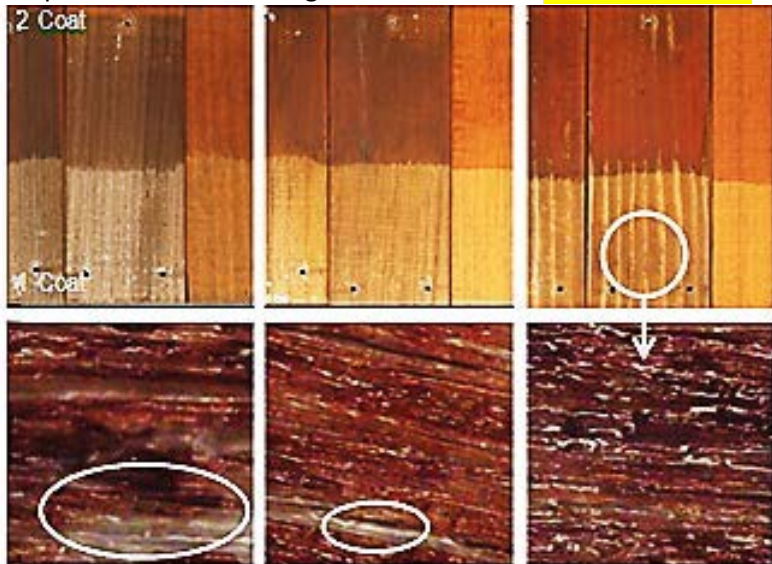

Worn spots over time, Cracking in harsh sun exposure, Yellowing caused by UV rays affect transparency.

Better Transparency, Durability and will withstand even the toughest conditions!

Protecting your Wood,
your Family & your
Environment

Environmentally Friendly Product

- Zero VOC/ Zero exempt VOC, like Acetone and TBaC, which is on the Cal EPA watch list
- Zero Heavy metal additives
- Produced with 50% renewable resources

Easy to Apply & Maintain:

- Superb recoat time allows projects to be finished in one day
- Does not peel or flake, eliminating the need to sand or strip when maintaining

Excellent Durability

- Double improvement in wood protection than competitors and previous formulas
- Lasts longer, retains color better, experiences less darkening and flexes with wood
- Performance Tested around the shores of Lake Tahoe

Outstanding penetration:

- Enters deep into wood surface, protecting against discoloration, cracking, peeling
- Effective on wide variety of wood species
- Enhances & preserves the natural beauty of wood grain, rather than hiding it
- Oxide colorants penetrate deep into wood
